

Araria, Bihar

Overall Risk: 10.0/10 · National Rank: 1/713 · Priority: MODERATE

1. THE CLIMATE THREAT

Dominant hazard: FLOOD (5.7/10)
WASH disruption: ~87 days/year of climate-driven WASH stress

2. WHO IS AT RISK

Total Population	4.0M
Children Under 5	521K
Elderly 60+	241K

3. WHY THIS DISTRICT

High flood hazard (5.7) compounded by poor sanitation (32%) and high population (4.0M).
Key vulnerabilities: poor sanitation (40.0) · high exposure (4.0)
Adaptive capacity: 0.61 · Sanitation coverage: 32%

4. RECOMMENDED RESILIENCE ACTIONS

Schools: (1) Raise toilet blocks and handpumps above historical flood level (2) Elevated, sealed drinking-water storage to prevent contamination
Funded by: Samagra Shiksha (school infrastructure) · SBM
Anganwadis: (1) Construct elevated platform above flood level (2) Protected drinking-water source for infants
Funded by: Saksham Anganwadi / ICDS · JJM
Households: (1) Replace pit latrines with sealed/raised twin-pit or septic (2) Raised handpump platforms
Funded by: SBM-Gramin · Jal Jeevan Mission

Risk per ClimResWASH methodology, validated against observed health outcomes (heat-anaemia $r=0.41$, NFHS-5) and historical events (Mumbai Floods 2005, Kerala Floods 2018, Cyclone Amphan 2020, Marathwada Drought 2016, Delhi Heatwave 2023). See methodology report.
Data: NFHS-5 (WASH), CHIRPS/ERA5 (climate), WorldPop (population), ESA WorldCover (land use), WRIS (groundwater) · Generated by ClimResWASH · 03 July 2026 · Model estimates — complement with ground assessment.
