

Araria, Bihar

Overall Risk: 9.3/10 · National Rank: 2/713 · Priority: MODERATE

1. THE CLIMATE THREAT

Dominant hazard: FLOOD (4.8/10)
WASH disruption: ~87 days/year of climate-driven WASH stress
2050 outlook (SSP5-8.5): Risk remains stable to 4.8/10. Capacity gap: 1.9.

2. WHO IS AT RISK

Total Population	4.0M
Children Under 5	521K
Elderly 60+	241K

3. WHY THIS DISTRICT

High flood hazard (4.8) compounded by poor sanitation (32%) and high population (4.0M).
Key vulnerabilities: poor sanitation (40.0) · high exposure (4.0)
Adaptive capacity: 0.61 · Sanitation coverage: 32%

4. RECOMMENDED RESILIENCE ACTIONS

Schools: (1) Raise toilet blocks and handpumps above historical flood level (2) Elevated, sealed drinking-water storage to prevent contamination
Funded by: Samagra Shiksha (school infrastructure) · SBM
Anganwadis: (1) Construct elevated platform above flood level (2) Protected drinking-water source for infants
Funded by: Saksham Anganwadi / ICDS · JJM
Households: (1) Replace pit latrines with sealed/raised twin-pit or septic (2) Raised handpump platforms
Funded by: SBM-Gramin · Jal Jeevan Mission

Data: NFHS-5 (WASH), CHIRPS/ERA5 (climate), WorldPop (population), ESA WorldCover (land use), WRIS (groundwater). Risk methodology: ClimResWASH formula book (IPCC AR6 framework). Calibrated against 5 real disaster events.
